**Instructions:** To be completed by the local radiologist, for every MRI exam, and entered into CDART on the day of the MRI exam to document pathology identification and to notify the field center PIs of conditions seen on the MRI scan that need to be brought to the immediate attention of the participant and their physician. Conditions requiring immediate attention include either Conditionally Urgent Alerts not reported previously or any Urgent Alerts.

### ADMINISTRATIVE INFORMATION

0a. Read Date: __/__/____  
0b. Staff ID: __ __ __

### RESULTS

**Note:** The following incidental findings do not require an alert or physician notification:

- White matter ischemia
- Old infarcts
- Microhemorrhages
- Superficial siderosis
- Atrophy
- Lacunar infarcts
- Noncritical stenosis
- Remote bleeds

1. Are there any alerts present:
   
   - Y ☐ Yes
   - N ☐ No **END OF FORM**

2. Urgent Alerts
   
   a. Acute Infarction................................................................. ☐..................
   b. Subacute Infarct ............................................................. ☐..................
   c. Acute Subdural or Epidural Hematoma............................ ☐..................
   d. Subarachnoid Hemorrhage.............................................. ☐..................
   e. Acute Intraparenchymal Hematoma............................... ☐..................
   f. Local Comments (including location)
