INSTRUCTIONS FOR THE
PET IMAGING VISIT FORM (IVF)

I. General Instructions

This form should be started on the date of the PET scan; the last part (section C) will need to be completed at the time of the follow-up phone call.

II. Detailed Instructions for Each Item

1 and 2. Not completed for the NCS III MRI and PET study.

3. If a scale is available, the participant can/should be weighed and that number should be entered. If no scale is available, the participant should be asked his/her weight in pounds and this should be entered.

4. The date and time of the injection will need to be listed precisely. The PET technician will need to tell the ARIC staff member the time of the injection. The time should be listed in military time (24 hour clock).

5, 6, 7, 8 and 9. The staff member should comment on any complaints or problems noted during the PET scan, and the actions taken if appropriate.

10. Any response to the adverse event should be listed in a text field.

11. If an adverse event occurs during the PET scan, staff may choose to conduct a follow-up phone call with the participant approximately 2 days later. The need for this follow-up call will be at the staff member’s discretion.

    If a call is not required, then ‘No’ is selected.

    If a call is required, then ‘Yes’ is selected and the reminder of the form is completed.

12-15. Adverse events should be listed again, and any response to these events should be described.
