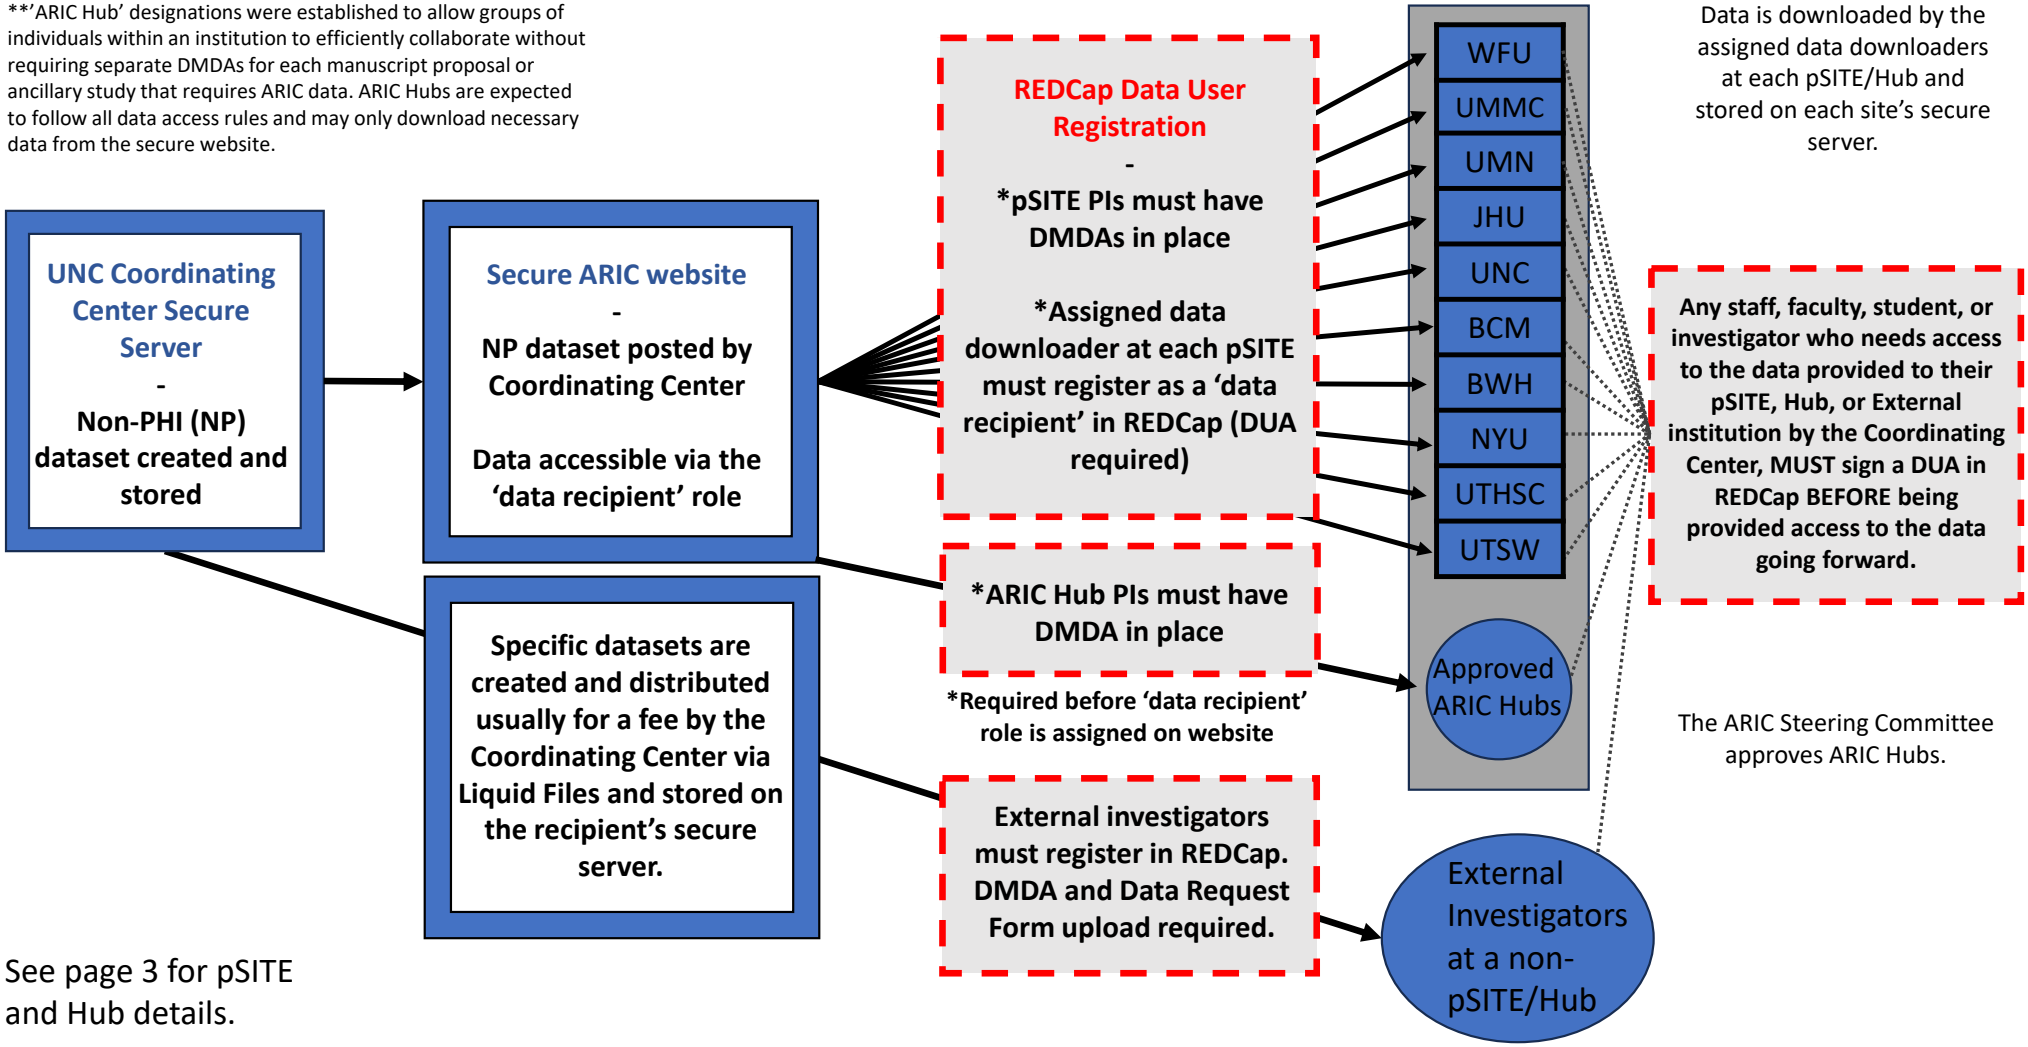
Non-PHI (NP) Dataset Distribution – pSITE, Hub, and non-pSITE/Hub

**'ARIC Hub' designations were established to allow groups of individuals within an institution to efficiently collaborate without requiring separate DMDAs for each manuscript proposal or ancillary study that requires ARIC data. ARIC Hubs are expected to follow all data access rules and may only download necessary data from the secure website.



See page 3 for pSITE and Hub details.

Limited Dataset Distribution – pSITE, Hub, and non-pSITE/Hub

- Specific restrictions apply to CMS, geocoded data, and other identifiable datasets.
- Rarely will external investigators be provided Limited data.
- Any investigator that requests Limited data will need to explain why De-identified data does not suffice.

REDCap Data User Registration

-

• Website directs the data requestor to REDCap
• Investigator uploads DMDA, Data Request form, and MS# or AS#
• DMDA is fully executed before upload to REDCap (per website instructions)
• Data use is reviewed and approved by Ancillary or Publications Committee before REDCap registration.

UNC Coordinating Center Secure Server

-

Documents reviewed by Micah McCumber. Dataset created and sent via Liquid Files to the data requestor who stores on a secure server.

UTHSC
UTSW

Approved ARIC Hubs

External Investigators at a non-pSITE/Hub

Any staff, faculty, student, or investigator who needs access to the data provided to their pSITE, Hub, or External Institution by the Coordinating Center, MUST sign a DUA in REDCap BEFORE being provided access to the data going forward. Please note, limited datasets must be stored in a separate location from NP datasets. Access must be limited only to those with a DUA*.

*CC and field center staff follow institutional procedures which replace the need for an individual DUA.

**'ARIC Hub' designations were established to allow groups of individuals within an institution to efficiently collaborate without requiring separate DMDAs for each manuscript proposal or ancillary study that requires ARIC data. ARIC Hubs are expected to follow all data access rules and may only download necessary data from the secure website.

See page 3 for pSite and Hub details.

	ARIC pSITE	Principal Investigator
WFU	Field Center: Forsyth County Wake Forest University	Lynne Wagenknecht Tim Hughes
UMMC	Field Center: Jackson University of Mississippi Medical Center	Tom Mosley Gwen Windham
UMN	Field Center: Minneapolis Suburbs University of Minnesota	Pamela Lutsey
JHU	Field Center: Washington County Johns Hopkins University	Elizabeth Selvin
UNC	Collaborative Studies Coordinating Center University of North Carolina – Chapel Hill	David Couper
BCM	Baylor College of Medicine (Lipid Lab)	Christie Ballantyne
BWH	Brigham and Women's Hospital (ECHO/SPECT)	Scott Solomon Sharmila Dorbala
NYU	New York University	Josef Coresh Morgan Grams
UTHSC	University of Texas Health Science Center (Genetics Lab)	Eric Boerwinkle
UTSW	University of Texas Southwestern (ECHO)	Amil Shah

ARIC Hub	Principal Investigator
Penn Medicine	Andrea Schneider
Columbia University	Elizabeth Oelsner
University of Michigan	Deborah Levine
George Washington University	Emma Stapp
NIH-NINDS	Rebecca Gottesman
NIH-NIA	Keenan Walker
NIH-NHLBI	May Montasser
Mayo Clinic	Clifford Jack
Washington University	Ganesh Chand Brendan Lucey
Beth Israel Deaconess Medical Center	Stephen Juraschek
