

ARIC MANUSCRIPT PROPOSAL FORM

Manuscript #010b

1. Title (length 26):

Antithrombin 3 Correlates

2. Writing Group (list individual with lead responsibility first): (order may change)

(lead) Conlin Folsom
 Wu Others
 Davis

3. Timeline:

1st draft: Spring 1990

4. Rationale:

AT3 may be associated with CVD. Little is known about its correlates. This factor doesn't fit well with the other ARIC hemostasis factors and therefore is proposed as a separate manuscript.

5. Main Hypothesis:

Biochemical and lifestyle factors will be correlated with AT3.

6. Data (variable, time window, source, inclusions/exclusions):

Hemostasis variables, smoking, lipids, insulin, physical activity, SBP, hormone use, menopause status, diabetes, BMI, WHR, education, age, sex, race.

Exclusions: anticoagulants

Inclusion: 2-1/2 years of data
